

Verge 2323 Aluminium Channel

The VERGE2323 profile is designed to be applied to the inner corner of a 90deg change in wall direction

The luminous surface provided on the polycarbonate cover is only 8mm wide for a very slim contemporary light effect produced after final plastering is complete over the side wings

LED Strips with a maximum width of 5mm to be only used inside the profile

The profile comes supplied standard with PC cover and 2x PC end caps fitting
