

Meir 2507 Aluminium Channel

The MEIR2507 with its shallow 7mm depth is an ideal choice for recessing into joinery and with side bezels can hide any imperfections in routed channel

Due to the shallow gap between the led strip and PC diffuser, extra care is required in the selection of the led strip to avoid a 'dotted' effect through the diffuser

The MEIR2507 profile is ideally used as an option where it is not visible to the eye [e.g uplighting behind headboards or in joinery where it is concealed by a downstand]

Model No **NL_HC_2.5_MEIR**

Material	AL6063-T5
Surface Processing	Anodized
Diffuser	Opal Polycarbonate
Light Transmittance	>60%
Max W tape	14.4W
Heat Dissipation
